

SETTING YOUR OWN COMINATION 3-DIAL PADLOCK

The pre-set combination is 0-0-0 and can be personalised by following these simple steps:

● **Step 1**

Pull up the shackle of the lock Diagram(a).

● **Step 2**

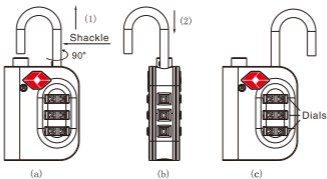

Rotate the shackle counter-clockwise 90°. Find the gap and press it down Diagram(b) and then continue to rotate for another 90° Diagram(c). Align the numbers to your desired combination by turning the dials.

● **Step 3**

Return the shackle back from the position in Diagram(b) to that in Diagram(c) to finish setting your combination, at which point the shackle pops up and the padlock is ready to use.

You may change your combination and reset your lock by following the above steps as often as you like.

Keep your combination in a safe and accessible place for future reference.
